ACKNOWLEDGMENT

Grateful acknowledgment is made to the Librarians of the British Meteorological Office at Bracknell and of the U.S. Weather Bureau in Washington, D.C., for allowing Mrs. Betty Rae and Miss Pauline Keehn to thoroughly check their respective files and collections to insure an exhaustive and accurate bibliography of Dr. Wexler's works over the past three decades. Also we wish to acknowledge the help given by Mr. James Caskey, and the editorial staff of the *Monthly Weather Review* for allowing us to check our bibliography against a list of over one hundred references to works of Harry Wexler in their files. Finally and most significant is the debt of gratitude we owe Dr. Wexler for his encouragement in the early days of meteorological abstracting—in fact, he was the one who gave us the initial impetus to begin abstracting in 1946 when the abstracts were published in the *Bulletin of the American Meteorological Society*.
